

# Military spouse license portability is overwhelmingly supported by Virginia voters

In May 2023, Merit and Embold Research partnered to survey 808 registered voters in Virginia in order to gauge their perceptions of and support for reciprocity of professional licenses across states.

**YES!**

Virginia voters demonstrate overwhelming, bipartisan support or both the use of digital documentation for professional licenses and the use of out-of-state professional licenses within the Commonwealth of Virginia. Moreover, voters see the implementation of reciprocity as an economic boon, both for military families and for Virginia as a whole.
